

MacBook Pro 15" Unibody 2.53 GHz Mid 2009 (Anti-Glare Option) Bluetooth Board Replacement

This guide is an internal guide that is used only as a prereq.

Written By: Walter Galan

INTRODUCTION

This guide is an internal guide that is used only as a prereq.

Step 1 — (Anti-Glare Option) Bluetooth Board

- Disconnect the Bluetooth cable by pulling the male end straight away from its socket.
- ⚠ Pull the connector parallel to the face of the logic board, not straight up.
- Use the flat end of a spudger to pry the Bluetooth antenna cable from its socket on the board.

Step 2

- Remove the two 8 mm Phillips screws securing the Bluetooth/camera cable retainer to the upper case.
- ⓘ One of the screws may remain captive in the Bluetooth/camera cable ground loop. If replacing the display, be sure to transfer this screw to the new unit.
- Lift the Bluetooth board/cable retainer assembly out of the upper case.

To reassemble your device, follow these instructions in reverse order.
